

Care, Repairs and Programs

How to look after your gear, where to get it fixed, and the programs that come with being a Cairn & Co. customer. This guide covers services we run from our workshop and store. For shipping, returns and the lifetime guarantee itself, see the policy pages on our website.

1. The Basecamp Workshop

Every repair is done by hand at our own workshop, the **Basecamp Workshop**, at **418 Alder Street, Bend, Oregon 97701**. It is open **Tuesday to Saturday, 9:00 am to 5:00 pm Pacific**, and closed Sunday and Monday. You can drop gear off in person or mail it in with a printed repair ticket.

Standard turnaround is **10 business days** from the day we receive your item. A rush service finishes in **3 business days** for an extra **\$20**.

The workshop is run by our head of repairs, **Marisol Okafor**, who has been patching tents since 2009. The workshop's resident dog, a border collie mix named **Juniper**, greets every drop-off.

Re-proofing service

We wash and re-apply the water-repellent finish (DWR) to any rain shell for **\$22 per jacket**, or **\$30** for jacket and pants together. It is ready in **3 business days**. Trail Crew members get two re-proofs a year free (see section 4).

2. Caring for your gear

Rain shells (Ridgeline 3L, Switchback Wind Shell)

1. Close all zips and Velcro, and empty the pockets.
2. Machine wash warm, **40°C / 104°F**, with a technical wash such as Nikwax Tech Wash. Never use fabric softener, which clogs the membrane.

3. Rinse twice.
4. Tumble dry on **medium heat for 20 minutes**. The heat reactivates the water-repellent finish. If water stops beading after drying, it is time to re-proof.

Down jackets and sleeping bags (Talus Down Hoodie, Ember 20)

1. Use a front-loading machine only. A top-loader's agitator tears baffles.
2. Wash cool, **30°C / 86°F**, on a gentle cycle with a down-specific wash.
3. Tumble dry on **low heat with three clean tennis balls**, which break up clumps. A jacket takes about **3 hours**; a sleeping bag can take **5 to 6 hours**.
4. Store sleeping bags loose in the large mesh storage sack, never compressed in their stuff sack.

Tents (Spire 1, Basin 2, Hearth 4)

Never machine wash a tent. Sponge it with lukewarm water and a little mild soap, and always pitch it to dry fully before storing; mildew damage is not covered by the guarantee. Re-seal seams every two to three seasons with a silicone seam sealer.

Merino (Merino Rib Beanie, Merino Trail Sock 3-Pack)

Wash cool on a wool cycle, lay flat to dry, and keep merino away from the tumble dryer, which shrinks it.

3. Gear rental

Try before you buy, or kit out a trip without buying everything. Rentals are picked up and returned at the Basecamp Workshop in Bend.

Item	Per night	Per week (7 nights)
Basin 2 backpacking tent	\$18	\$95
Hearth 4 camp tent	\$26	\$140
Cairn 45 or Long Haul pack	\$12	\$65
Ember 20 sleeping bag (with liner)	\$14	\$75
Loft insulated sleeping pad	\$6	\$32

We take a refundable **deposit of 50%** of the item's retail price. If you buy the same item within **30 days** of returning a rental, we take the rental fee off the purchase price. Late returns cost one extra night per day late.
